Projects

NoBuRi – Nori Burger Rice (F&B Brand)

Business Strategy & Branding

BINUS Business School Main Project · 2023 – Present

- Developed a modern Japanese-inspired food brand concept targeting students and young workers in Bandung.
- Designed & developed 2 product prototypes: Nobu Chicken Delight & Nobu YakiBeef Special. Tested packaging concept (Toast Box 9.5×5×12.5 cm).
- Created Business Model Canvas (BMC): customer segments, value propositions, channels, and revenue streams.
- Formulated STP strategy (Segmentation, Targeting, Positioning) and digital marketing campaign via social media + customer loyalty program.
- Conducted in-depth F&B industry trend analysis and competitor research in Bandung.

NAFC – Desktop Inventory Management System

Low-Code / Mendix

Digital Business Major Project · October 2024 – January 2025

- Built a desktop-based inventory management system for NAFC Muslim Wear using Mendix low-code platform.
- Designed domain model to structure system data and define entity relationships.
- Implemented business logic using Mendix microflows to automate application processes and inventory workflows.

SUMA-TECH – Web-Based Industrial Equipment System

Business Analysis & System Design

Advanced Business Application Development · Genap 2025/2026

- Identified 3 core pain points: manual inventory causing stock discrepancies, delayed COGS calculation, and lack of real-time managerial visibility.
- Produced full documentation: Activity Diagram (As-Is & To-Be), Use Case Diagram (12+ use cases), and Fully-Developed Use Case Descriptions.
- Handled all deliverables except video and poster: business analysis, process flowcharting, use case writing, and project documentation.

Thank You!

Let's connect and build something impactful together.
